**WARNING**

**For Your Child's Safety - Read All Instructions**

**CAUTION**

- Adult supervision required.
- Keep unassembled parts out of child's reach.
- Do **NOT** allow child to run or play while holding the cup.
- Always check the temperature of the cup contents before feeding.
- Microwave heating of cup contents can cause uneven heating and is not recommended.
- It is **NOT** recommended to use cups with oil based foods that may stain or discolor the cups. Do **NOT** use cups with carbonated drinks or juices that contain pulp.

**WARNING**

**For Your Child's Safety - Read All Instructions**

- Continuous and prolonged sucking of milk, formula, and other fluids can cause tooth decay.
- **NEVER** use spout or straw as teether or soother.
- Straws are not suitable for children under 6 months of age.
- Inspect carefully before each use, make sure there are no broken parts or sharp edges. Discard cup at the first sign of damage.
- Chicco cups are interchangeable. Do **NOT** use cup parts or components not included in the Chicco Cup range.
- Do **NOT** leave cups in direct sunlight.
- The cups are not intended to store liquid for extended periods of time.

**Before Use**

**BEFORE FIRST USE:** Non-insulated cups can be sterilized using steam sterilization or cold sterilization. Non-insulated cups can also be sterilized in boiling water for 5 minutes, before first use. Allow to cool completely and dry thoroughly. Do **NOT** boil or sterilize the insulated cups. All parts are dishwasher safe - top rack **ONLY**. Use of a dishwasher may accelerate wear.

- Always make sure the lid is screwed tightly on to the cup to avoid leaking.

**Cleaning**

To ensure optimal hygiene, always wash and rinse thoroughly before and after each use using mild soap and warm water. Do **NOT** use bleach or any other harsh chemicals. Disassemble all parts completely, including the valve, before cleaning. **ALWAYS** clean the inside of the cup lid where the valve is attached. All cups and parts are dishwasher safe on delicate cycle - top rack **ONLY**. Use of a dishwasher may accelerate wear. Dry thoroughly before storing in a dry place.

Do **NOT** boil or sterilize the insulated cups - all other cups can be sterilized. Allow to cool completely and dry thoroughly.

**Using the Silicone Cup Valve**

**Using the Silicone Valve:**

- Pull the Silicone Valve out of the cup lid to remove.
- When re-attaching the valve, always line up the larger ring with the largest part on the valve.
- Make sure the valve is completely pushed down into the rings on the cup lid.

**Note:** ALWAYS clean the inside of the cup lid where the valve is attached.

**Using the Transition Cup**

**Attaching the Silicone Spout:**

- Pull the Silicone Spout up through the cup ring.
- Make sure the air vents on the cup ring are centered in the cutouts on the Silicone Spout, as shown.

**Using the 360° Rim Trainer**

**Attaching the Silicone Rim:** Insert Silicone Rim into the cup ring. Push the groove down until it seals completely around the rib.

**Before Each Use:** Push down on center of the Silicone Rim to ensure a tight seal.

**Using the Flip-Top Straw Lid**

**Using the Flip-Top Straw Lid:**

- Push over on the Sliding Cap to store the straw when not in use.
- The straw can be removed and separated when cleaning.
